

CRUSH COSTS

and Downtime too!

WPT Power Take Off Clutches tough enough for every application

Suitable for diesel engines up to 2000 hp.

Flywheel connection inc. pilot bearing, housing sizes SAE 00 - 5. 1, 2 or 3 plate, 8", 11" and 14" models in hand lever operation.

Standard Bronze or Heavy Duty ball bearing shifter collars. Competitive pricing and interchange with most manufacturers. Hydraulic and Air operated versions available.

Alternative to... Rockford, Twin Disc, Transfluid, Desch, etc.

PLUS Heavy duty non-asbestos Kevlar® impregnated friction discs

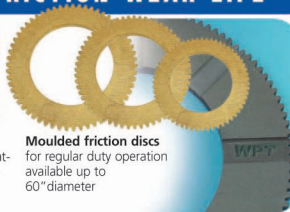

MASSIVE INCREASE IN FRICTION WEAR LIFE

Typical failure on PTO clutch friction discs. Note gear tooth damage, which can lead to expensive failure of clutch assembly.

Laminated woven gear tooth friction disc incorporating Kevlar fibres, gives exceptional tooth strength.

Moulded friction discs for regular duty operation available up to 60" diameter
